Allow EPC to be Reference Data Read Only

- The OO can export a package that will convert the package **importer** to be Reference Data Read Only.
- Once The EPC import this package, he will be no longer able to do modifications on the Reference Data
- The only way to update that EPC's reference data is by sending an update from the OO .
- The OO have full control on the Reference Data.

Workflows

Allow EPC to be Reference Data Read Only

Export Project

 You can export your project with view only reference data. Note: Importing the project to the target domain changes all the target domain's reference data to view only. No changes can be made to the target domain's reference data after importing the view only project. Click Yes, to export with view only reference data. Click No, to continue the export without restrictions on reference data access.

Yes No

Import Project

 The project you are importing contains view only restricted reference data. All the reference data of the target Domain you are importing to will become view only when the project is imported. Do you want to continue the import?

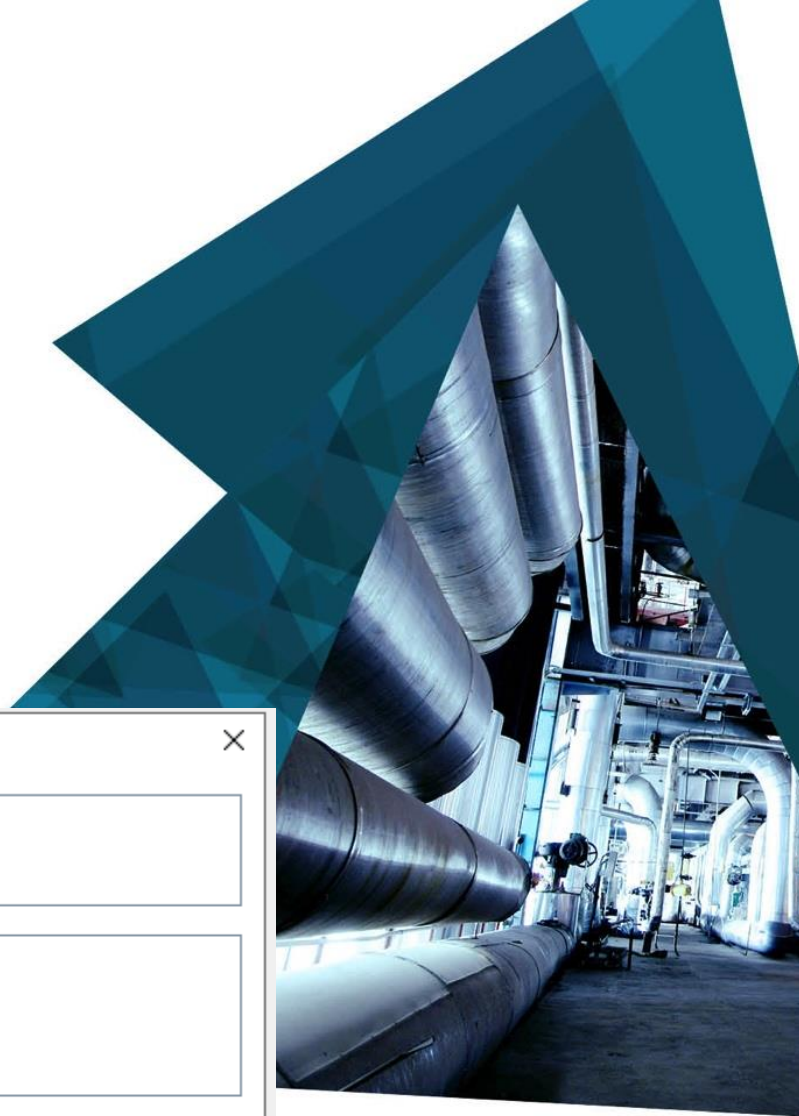

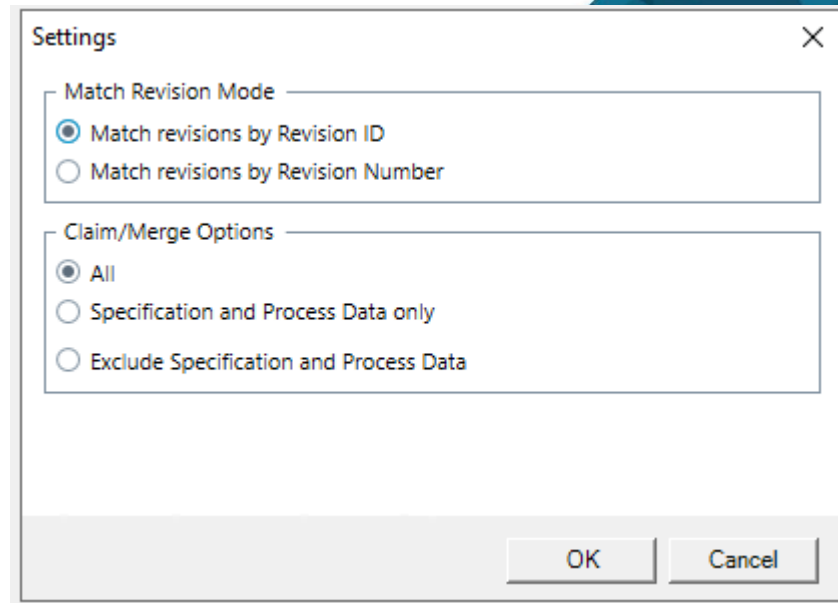

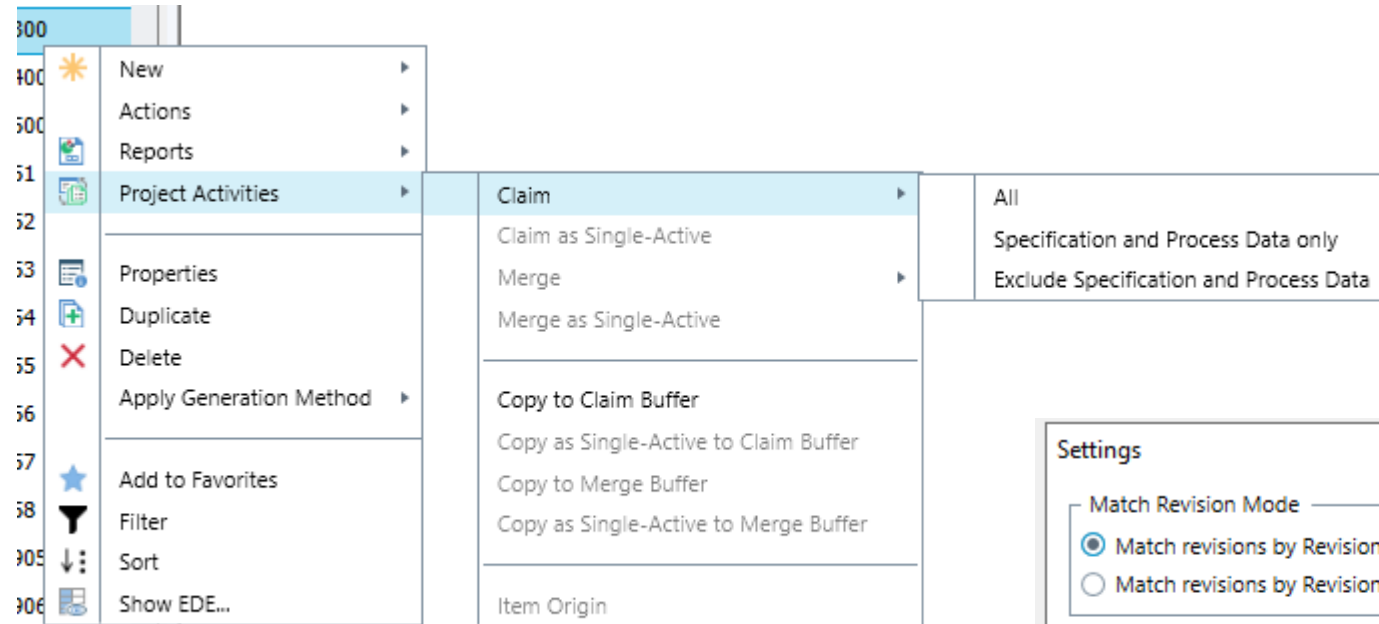

Yes No

Access Rights

 This domain's reference data is set by the software as View Only and cannot be modified. This is because a View Only package has been imported to this domain.

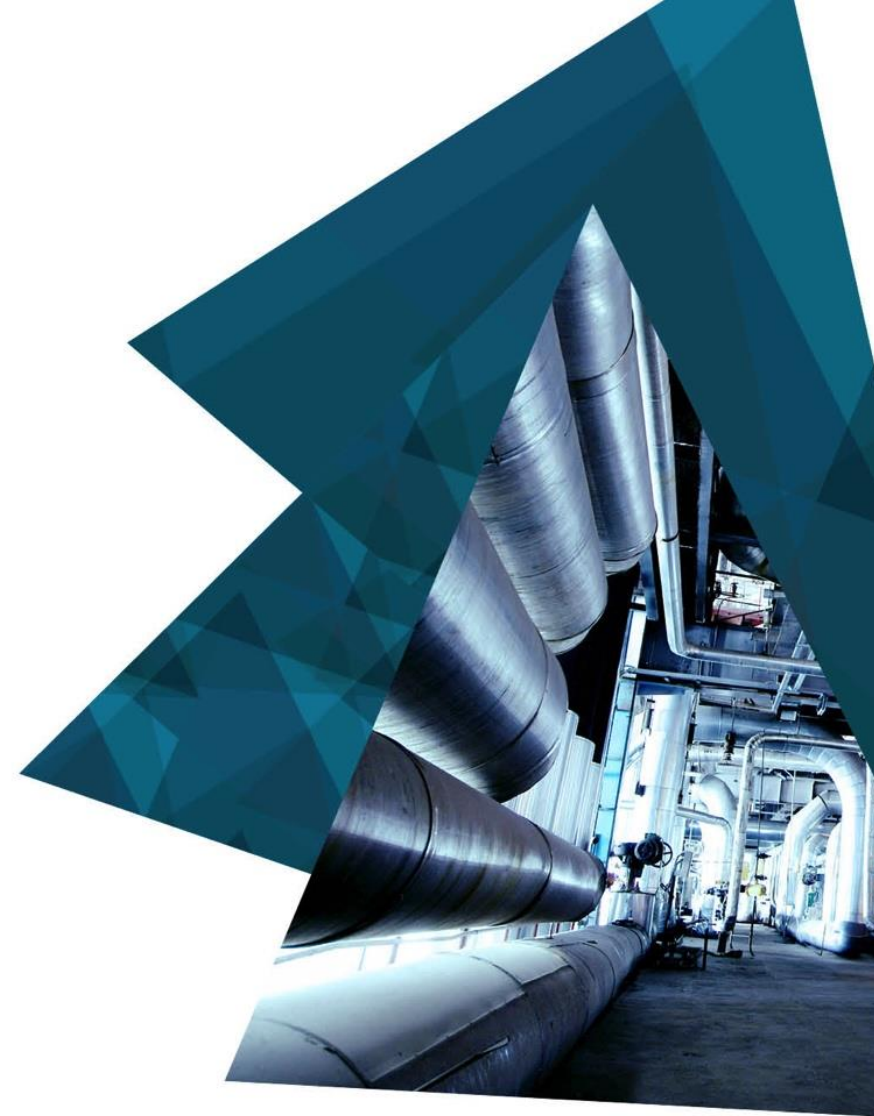

OK

Allow Claiming / Merging of basic or detailed engineering data
