Licensing SDK

- Company name
- Username (obfuscated)
- Device Name (obfuscated)
- Remote user (obfuscated)
- Remote Device Name (obfuscated)
- License Usage
- Licensing Management
- Product Usage
- Customer reportable Data
 - Project
 - User definable fields

Typical ISL Questions:

- **Did ISL created new license types for HxGN PPM products?**
- No ISL just manages historical PPM license policy that has been in place for many years.
- **ISL requires special ports be opened by my IT group?**
- No ISL uses standard port 80 and 443. Most every company that allows internet access for their employees typically these two ports are the ones used
- **What security is invoked with ISL**
- Encrypt the data at point of entry and we encrypt the transport layer.
- **Does ISL support GDPR?**
- Yes, all “personal” data is encrypted and is not ever decrypted unless the owning company authorizes PPM to allow their admins to see decrypted personal data.
- **Does ISL collect business sensitive or Intellectual Property data, i.e. file names, work processes, any custom code used, etc...**
- No. PPM has a very detailed process to approve the content collected by ISL. PPM only collect license usage data and then specific feature/function usage that is OOTB capabilities delivered with the product.

Thank You!
