

May 14, 2024, Houston SI LTUF Meeting

Safety Topic – Announcements – Agenda

FLUOR[®]

John Dressel, Fluor Fellow of
Smart Instrumentation

Safety Topic – Be Weather Aware

- ▶ Experts say the most important part of weather awareness is simply having a plan! That includes a severe weather plan for your home, your car and even your workplace
- ▶ Know where the shelter areas are and the location of basic emergency supplies
- ▶ Monitor the weather in your area with a weather app on your phone. Most will give you alerts and warnings of severe storms
- ▶ If there is a tornado warning in your area, get to the nearest shelter and seek out a lower level and get as many walls between you and the outside as possible.
- ▶ If shelter is not an option, get down in your car and cover your head or abandon your vehicle and hide in a low-lying area like a ditch or ravine
- ▶ Remember - severe weather includes High Winds, Hail and Tornadoes
