

Smart Instrumentation LTUF Wish List

Houston Smart Instrumentation LTUF Wish List

FLUOR[®]

John Dressel, Fluor Fellow of
Smart Instrumentation

Smart Instrumentation LTUF Wish List

- John Dressel, Fluor – I wish Smart Instrumentation would be able generate all drawing reports in AutoCAD and MicroStation as well as SmartSketch.
- Russ Carlson, Kiewit - I wish Smart Instrumentation would provide a more stable Import Utility that checks for all layers of errors on one run-through.
- Kathleen Douglas, CDI – I wish Smart Instrumentation would bring back full functionality to the browser so users can see the actual table and data field names.
- Hunter Poole, Worley – I wish SPI would add Charms components and Charms backplanes... That would easily be able use and wire and be able to generate IO Reports... By Backplane
- Rae Zhang, Eichleay - I wish Smart Instrumentation would make claim/merge as easier as older version 2013

Smart Instrumentation LTUF Wish List

- Rae Zhang, Eichleay - I wish Smart Instrumentation would make upgrades effortless.
- Andrew Kunev, Honeywell – I wish Smart Instrumentation would be available without the Firewall-piercing Necessity of Smart Cloud Licensing.
- Mariana Cunningham, Chevron – I wish Smart Instrumentation would make it easier to search where items are claimed to in an O/O database (instead of having to run SQL statements).
- Peter Blankestijn, Worley – I wish Smart Instrumentation to have panel import by reference just like import cable by reference.
- Peter Blankestijn, Worley – I wish Smart Instrumentation to have wiring equipment import by reference.

Smart Instrumentation LTUF Wish List

- Peter Blankestijn, Worley – I wish Smart Instrumentation to have the possibility to import auto wiring tasks and the auto wiring task window to be independent of the PAU.
- Henry Xia, Burns & McDonnell – I wish Smart Instrumentation would be using Excel as template of Instrument Datasheet (Specification), instead of PSR.
- Liam Webster, Fluor Canada – I wish Smart Instrumentation Access Rights were less complex and cumbersome.
- Liam Webster, Fluor Canada – I wish Smart Instrumentation would change Access Rights from per Plant and Unit to per Group.
- Ahmed Esaklul, ProLytX – I wish Smart Instrumentation would do a better job at history tracking.

Smart Instrumentation LTUF Wish List

- Xingheng Yu Hexagon – I wish Smart Instrumentation would support deleting pd doc or spec doc of a tag from UI.
- Christo Van Wyk, Worley – I wish Smart Instrumentation would create an Import Panels by Reference Data link, but also extend it to include the connected cable
- Lydia Brown, Honeywell – I wish Smart Instrumentation would have a batch print for loops and connection diagrams
- Lydia Brown, Honeywell – I wish Smart Instrumentation would include specifications in the EDE

Smart Instrumentation LTUF Wish List

- Floyd Haywood, Motiva had the following wish list:
 - “I wish Smart Instrumentation would update/add context to error messages so that we know what they actually mean”
 - “I wish Smart Instrumentation would allow easier customization of their canned reports or create more Enhanced Report Styles”
 - “I wish Smart Instrumentation would overhaul the block diagram; it is currently useless as it does not work like a block diagram should work”
 - “I wish Smart Instrumentation would overhaul, test, and properly document each access right and what it affects”
 - “I wish Smart Instrumentation would overhaul their printing process”
 - “I wish Smart Instrumentation would allow batch printing of all report types in the database, which print individually and named properly or in a single pdf based on user choice”
