**TECHNICAL USER FORUM**  
Change Request Ranking Website

---

Welcome to the Technical User Forum (TUF) website. This site is designed to enable the Intergraph® User Community to put forward Change Request ideas. Once an idea has been submitted, it undergoes peer review by the entire user community. Intergraph® will provide responses to all highly Ranked ideas.

Now's your chance. Join the team, put forward your ideas and Let's Make Change Happen!!

**This Months Top 5 Ideas**

CR# 86046 The terminal type bitmap that I have assigned appears to be propagating to the adjacent entities;...	Built Implemented: SPI 2007	SmartPlant Instrumentation®

## Site Activity

- Intergraph has updated the status of each CR posted on the site.

Special thanks to Guy Masin for updating the status of each CR.

- Trouble Reports TRs can now be added
- Wish-List ideas can be presented for informal surveys

### Intergraph's Latest Idea Commitments

#### Capture Your Idea

Fill in the data below to add the idea into the system for ranking.

#### Official CR Number

Enter the customer request number you received from Intergraph.

#### TR Number

Enter the trouble report number you received from Intergraph.

#### Wishlist Number

Enter the wishlist number.

#### SR Number (Optional)

Enter the service request number you received from Intergraph.

#### Idea

You can use bold, italics, underlines etc. by using simple HTML code for formatting, such as such as `<b>bold</b>`, `<i>italic</i>`, or `<u>underlined</u>` text. Note that these code commands will not display the changes to the text until you submit the idea into the system for Ranking.

- SPI Integration Coverage

- Should the site include Integration in a similar way as SPEL?

## Integration / Data Management

- Integrated Mode (Publish & Retrieve)
- Non Integrated (Manual)

## Integration (Publish & Retrieve)

- SmartPlant 3D
- SmartPlant Construction
- SmartPlant Electrical
- SmartPlant Instrumentation
- SmartPlant Marine 3D
- SmartPlant Materials
- SmartPlant P&ID
- SmartPlant PDS
- Other SmartPlant Product
- Revision / Version Management

## Integration (Manual Export / Import / Ideal)

- 3rd Party Applications
- Ideal
- SmartPlant 3D
- SmartPlant Construction
- SmartPlant Electrical
- SmartPlant Instrumentation
- SmartPlant Marine 3D
- SmartPlant Materials
- SmartPlant P&ID
- SmartPlant PDS
- Other SmartPlant Product

- SPI Site Statistics
  - **89** registered companies
  - **214** registered users
  - **39** Ranks exist on the most Ranked CR
  - **71** CRs
  - **8** CRs implemented (built by Intergraph)
  - **1** CR under construction
  - **9** CRs to be implemented
  - **3** CRs Closed
  - **2** CRs that require more info.

Change Request	Trouble Report	Wish List	My Rank	Average Rank	Votes	Status	Intergraph Comment
72770			7	8.26	31	Open	No Comment
<b>Description:</b>							
Reference Entity Access Rights; the 'Plant Hierarchy Management', 'Reference Cable Management' and 'Reference Panel Management' entites need to be on FULL in order for the user to access and use all Wiring Entities. Should be able to set SPI so that users can USE reference entities, but not edit/add/delete them.							
84402			7	8.13	16	Open	No Comment
<b>Description:</b>							
With Unit Copy what ever is in the Source Unit is copied to the New Unit and most tagged objects are re named according to the defined naming conventions. However the Document Numbers are not updated at both Loop and Instrument level (Spec Sheets and ESL). To do this the loop/instrument has to selected, its properties sheet opened and the 'Update Document number' check box selected. On Saving the properties sheet the document names are updated to the Naming convention. This is a significant waste of engineering time and a task which will get missed and lead to errors in issued document packs. We would like the document names to be automatically updated during the Unit Copy process as per the other objects.

<b>Description:</b>							
In the Enhanced Report Utility, I can save SmartText (save custom changes -> this dwg only). But Text Boxes do not save. User can save smarttext, lines, circles, and rectangles. But they can't save: text boxes, curves etc. Even with the stuff that does save sometimes you have to attach redlining, and other times (ie: smarttext) you don't. Further, there is no documentation on what will save and what wont.

<b>Description:</b> Separate ESL access rights: designers must have 'full' access to the Enhanced Report Utility because they need to 'save custom changes', save smarttext and save redlining on their drawings. However, these basic access rights means that they can also add/edit/delete macros ALWAYS FOR ALL DRAWINGS ASSIGNED TO THAT LAYOUT. They should not have the ability to add/edit/delete macros for layouts, but should have access only for thier specific drawing!							
96361			7	7.53	17	Open	No Comment
<b>Description:</b> <b>Enhanced Reports - Shields appear to anchor in a specific position.</b> The individual shields are anchored outside of the wires and the OS coming up from the bottom of the middle strip is anchored next to the cable sets. Users can move the SHLD bars around but cannot touch the shield wires. See attachment for shots and details.
